POST ECSITE DIRECTOR'S FORUM TOURS

Ciência Viva – National Agency for Scientific and Technological Culture, Portugal, is a nationwide organization with a network of 22 Science Centers spread across the country, which fuels a social movement in favor of science and scientific culture involving hundreds of thousands of researchers and citizens, students and teachers, young people and adults.

Each Ciência Viva Centre feeds its own local and regional network, and its institutional connection to sources of knowledge and technology – scientific and higher education institutions – makes Ciência Viva Centers key players in bringing schools, the scientific community and the production of knowledge and innovation closer together.

CIÊNCIA VIVA SCIENCE CENTERS ARE :

- *Up-to-date learning platforms, in tune with the latest advances in knowledge.*
- *Agents for mobilizing parents, schools and local authorities for educational projects linked to scientific, academic, business and cultural institutions.*
- *Spaces for pedagogical innovation, based on scientific content and methodologies.*
